

Deep Well Construction Site in Gouye Ndiogou/Senegal

Franz Bickel from "Help for Africa – Water for the Senegal" visited the construction site in January and confirmed the positive progression of our Deep Well Project. Last year, on April the 24th, the on-site construction team was very lucky and found water in 95m depth. Since then the project developed very fast and we are proud to announce to you that the water tower (150m³) is nearly finished. The infrastructure around the water tower is in construction and the people are highly motivated to finish the project by the end of 2011. We are looking forward to soon supporting 15,000 people with portable water.

Busch School in Goback-Sossos/ Senegal

The fundraising for the Busch School project ended on the 31st of January 2011. Thanks to your support and your donations we raised € 8,265.46. The money will be given to Mrs. Heike Meßenzehl who will buy the school material and equipment personally with the teacher on site in April 2011. TOOLS FOR LIFE is very proud to help these children to invest in their future. Thank you again for your support!
