- School- and Water project in Togoville/Togo
- Press release Award 2011 "Innovation" Deutschland – Land der Ideen

Busch School Goback/Senegal

Since last week, 52 pupils of the village Goback in Senegal have the possibility to use their new school equipment and furniture in their busch school. Thanks to your generous donations during the ROTHENBERGER Christmas fundraising campaign Mrs. Messenzehl from Help for Africa eV organized 15 school desks and chairs, a new chalkboard and writing materials for the children. You can imagine the enthusiasm and excitement of everybody on the spot! In the nearer future we plan to support more busch schools because we still believe that education means the future for those children.

School- and Water project in Togoville/Togo

Mr. Georges Ameganvi from the organization Pro Togoville sent me a short report for the ongoing school- and water project in Togoville. The project is doing very well according to plan. On the 23rd of April a school kitchen was officially opened and offered the schoolchildren their first meal. The rest of the school building is still in final construction and hopefully soon finished. The well near the school building is fixed and we are looking forward to install the water pump. There are some more adjustment to make and some more tools to acquire but it is just a question of time that we will achieve our goal.

Press release Award 2011 "Innovation" Deutschland – Land der Ideen

"Your work makes a big difference for people - you give people access to water!"

(Dr. Sandra Rothenberger)
