### Rainwater Tanks Project in Kagera/ Tanzania

The third and last construction phase of the Rainwater reservoirs in Kagera/ Tanzania is nearly finished. Our partner organization Engineers without Borders told us that in total, 18 Rainwater Tanks (14 x 20,000 litre and 4 x 40,000 litre) were constructed with the support of the TOOLS FOR LIFE Foundation. After this successful cooperation with Engineers without Borders and TOOLS FOR LIFE, our new project – the construction of 200,000 litre tanks - will start soon with the conception phase. We will keep you posted!

### Deep Well Construction in Gouye-Ndiogou/ Senegal

Franz Bickel from “Help for Africa – Water for the Senegal” announced that the deep borehole was a big success and that water was found already at 90 m – instead of 150 m - below surface. The next step will now be to build the water tower, including the water pump. The people in Gouye-Ndiogou are very excited and motivated to finish this project by October 2011. In the future, this project will supply 27 villages (14,000 people) with portable water!
